

AIRLAB SUBANG

# AVIATION TECHNICAL ENGLISH

Enhances proficiency in technical English used in aviation, including terminology, communication skills, and understanding technical documentation.

## Introduction

Effective communication is essential in the aviation industry, where precision and clarity are paramount. This course focuses on developing English language skills specific to the aviation industry, including technical vocabulary, phraseology, and communication techniques used in maintenance, operations, and safety contexts. Participants will learn how to communicate accurately and confidently in English, ensuring that instructions, reports, and communications are clearly understood by all parties involved. The course also includes practice exercises and real-world scenarios to reinforce learning.

## Course Objectives

To enhance participants' English language skills for effective communication in technical and operational aviation contexts.

## Course Outline

- Introduction to Aviation Technical English
- Technical Vocabulary and Phraseology
- Communication Techniques
- Reading and Writing Technical Documents
- Speaking and Listening in Aviation Contexts
- Practice Exercises and Scenarios
- Case Studies
