

AIRLAB SUBANG

CONFINED SPACE AWARENESS

Provides safety guidelines and procedures for working in confined spaces within aviation environments, including hazard identification and emergency response.

Introduction

Working in confined spaces presents unique challenges and risks that require specialized training and precautions. This course provides participants with the knowledge and skills necessary to work safely in confined spaces within the aviation industry. The course covers the regulatory requirements for confined space entry, the identification of potential hazards, and the implementation of safety measures to protect workers. Participants will learn how to assess risks, use appropriate personal protective equipment (PPE), and follow emergency procedures to ensure their safety when working in confined spaces.

Course Objectives

To provide participants with the knowledge and skills to work safely in confined spaces within the aviation industry.

Course Outline

- Overview of Confined Spaces
- Regulatory Requirements
- Hazard Identification and Risk Assessment
- Safety Procedures
- Personal Protective Equipment (PPE)
- Emergency Response
- Case Studies
