

AIRLAB SUBANG

DANGEROUS GOODS REGULATION AWARENESS

Covers the regulations and handling procedures for dangerous goods in aviation, including packaging, labeling, and emergency response.

Introduction

Handling and transporting dangerous goods in aviation requires strict adherence to regulations to ensure the safety of passengers, crew, and aircraft. This course provides participants with a comprehensive understanding of the regulations and best practices for managing dangerous goods. The course covers the classification, packaging, labeling, and storage of dangerous goods, as well as the procedures for responding to emergencies involving hazardous materials. Participants will also learn about the documentation and reporting requirements necessary for regulatory compliance.

Course Objectives

To ensure participants are aware of the regulatory requirements and best practices for safely handling and transporting dangerous goods.
