

AIRLAB SUBANG

DRUG AND ALCOHOL MANAGEMENT PLAN (DAMP)

Focuses on developing and implementing policies to manage drug and alcohol use in aviation, including testing procedures and compliance.

Introduction

The management of drug and alcohol use in the aviation industry is critical to ensuring safety and compliance. This course provides participants with an understanding of the regulatory requirements for drug and alcohol management, including the development and implementation of a Drug and Alcohol Management Plan (DAMP). The course covers the procedures for testing, reporting, and managing drug and alcohol use among aviation personnel. Participants will learn how to create a DAMP that meets regulatory standards and promotes a safe and responsible workplace culture.

Course Objectives

To ensure participants understand the regulatory requirements and best practices for managing drug and alcohol use in the aviation industry.

Course Outline

- Overview of Drug and Alcohol Management
- Regulatory Requirements
- Developing a DAMP
- Testing and Reporting Procedures
- Managing Positive Test Results
