

AIRLAB SUBANG

EASA AIR LEGISLATION

Covers European Union Aviation Safety Agency (EASA) regulations and laws governing aviation operations, including certification, maintenance, and safety standards.

Introduction

EASA air legislation forms the backbone of aviation safety and compliance in Europe. This course offers a comprehensive overview of the European Aviation Safety Agency's (EASA) regulatory framework, focusing on the roles and responsibilities of aviation professionals in maintaining compliance. Participants will explore the various parts of EASA legislation, including Part 21, 145, M, and 147, gaining a solid understanding of certification, continuing airworthiness, and organizational requirements. The course is essential for anyone involved in aviation maintenance, operations, and management.

Course Objectives

To familiarize participants with EASA regulations, ensuring compliance in their respective roles within the aviation industry.

Course Outline

- Overview of EASA
- Regulatory Framework
- EASA Part 21, 145, M, and 147
- Continuing Airworthiness
