

AIRLAB SUBANG

EASA PART 145

Details the EASA requirements for aircraft maintenance organizations, focusing on quality systems, personnel qualifications, and maintenance procedures.

Introduction

EASA Part 145 sets the standards for the approval and operation of maintenance organizations in the aviation industry. This course provides an in-depth look at the regulations and requirements that maintenance organizations must adhere to under Part 145. Participants will learn about the approval process, the responsibilities of maintenance personnel, and the importance of maintaining a robust quality and safety management system. The course also covers compliance monitoring, reporting, and record-keeping practices essential for sustaining Part 145 approval.

Course Objectives

To provide a thorough understanding of EASA Part 145 regulations and their application within an approved maintenance organization.

Course Outline

- Introduction to EASA Part 145
- Approval Process
- Maintenance Procedures and Standards
- Personnel Requirements
