

AIRLAB SUBANG

EASA PART 21 SUBPART G / F

Covers the EASA requirements for aircraft production and modifications, including the responsibilities of production organizations and design approval.

Introduction

EASA Part 21 Subpart G and F establish the requirements for organizations involved in the production and design of aircraft, parts, and appliances. This course provides a detailed overview of the approval processes for these organizations, including the necessary documentation, quality management systems, and compliance monitoring. Participants will learn about the certification procedures, the roles of design and production organizations, and the importance of adhering to EASA standards to maintain their approvals.

Course Objectives

To provide a comprehensive understanding of EASA Part 21 Subpart G and F, and the approval process for production and design organizations.
