

AIRLAB SUBANG

FOREIGN OBJECT DEBRIS (FOD)

Teaches strategies for preventing and managing foreign object debris to avoid damage to aircraft and ensure operational safety.

Introduction

Foreign Object Debris (FOD) poses a significant risk to aircraft safety and operational efficiency. This course provides participants with an understanding of the risks associated with FOD and the best practices for its prevention. The course covers the identification of potential FOD hazards, the implementation of FOD prevention programs, and the regulatory requirements for managing FOD risks. Participants will learn how to conduct FOD inspections, use appropriate tools and equipment, and follow procedures to minimize the presence of FOD in operational areas.

Course Objectives

To equip participants with the knowledge and skills to effectively prevent and manage FOD risks in aviation environments.

Course Outline

- Introduction to FOD
- Regulatory Requirements
- Identifying FOD Hazards
- FOD Prevention Programs
- Conducting FOD Inspections
- Tools and Equipment for FOD Management
- Case Studies
