

AIRLAB SUBANG

GROUND HANDLING

Focuses on procedures and best practices for handling aircraft on the ground, including passenger services, baggage handling, and aircraft servicing.

Introduction

Ground handling is a vital component of aviation operations, ensuring that aircraft are serviced, loaded, and dispatched safely and efficiently. This course provides detailed instruction on the procedures, equipment, and safety measures involved in ground handling. Participants will learn about the responsibilities of ground handling personnel, the importance of safety protocols, and the regulations that govern these activities. The course also covers emergency procedures and the best practices for minimizing risks on the ramp.

Course Objectives

To provide participants with knowledge and skills for safe, efficient, and compliant ground handling operations.

Course Outline

- Ground Handling Overview
- Safety Procedures
- Equipment and Operations
- Ramp Safety
- Aircraft Marshalling
- Baggage and Cargo Handling
- Emergency Procedures
- Case Studies
