

AIRLAB SUBANG

# INCOMING INSPECTION COURSE

- Teaches the procedures for inspecting incoming aircraft parts and components to ensure they meet safety and quality standards before use.
- 

## Introduction

Inspecting incoming aircraft parts and materials is a critical step in ensuring the quality and safety of aviation operations. This course provides participants with the knowledge and skills necessary to conduct thorough inspections of incoming parts and materials. The course covers regulatory requirements, inspection techniques, and documentation procedures to ensure that all parts meet the required standards before being used in aircraft maintenance or operations. Participants will also learn about common issues that can arise during inspections and how to address them effectively.

## Course Objectives

To ensure participants can effectively carry out inspections to verify the quality and compliance of incoming parts and materials.

## Course Outline

- Overview of Incoming Inspections
- Regulatory Requirements
- Inspection Techniques
- Documentation and Record Keeping
- Reporting Procedures
- Quality Assurance
- Case Studies
