

AIRLAB SUBANG

# SUSPECTED UNAPPROVED PARTS (SUP)

Focuses on identifying and handling suspected unapproved aircraft parts to prevent their use and ensure airworthiness.

## Introduction

The use of suspected unapproved parts (SUP) in aviation poses a significant safety risk. This course provides participants with the knowledge and skills necessary to identify, manage, and report SUPs. The course covers the regulatory requirements for SUP management, the procedures for inspecting and verifying parts, and the actions to take if an SUP is discovered. Participants will learn how to implement SUP prevention programs, ensuring that only approved and compliant parts are used in aviation operations.

## Course Objectives

To provide participants with the knowledge and skills to identify and manage suspected unapproved parts, ensuring the safety and compliance of aviation operations.

## Course Outline

- Introduction to SUP
- Regulatory Requirements
- Identifying Suspected Unapproved Parts
- Inspection and Verification Procedures
- Reporting and Managing SUP
- Implementing SUP Prevention Programs
- Case Studies
