

AIRLAB SUBANG

WHEELS & BRAKES MAINTENANCE

Covers the principles and practices of maintaining aircraft wheels and brake systems.

Introduction

Wheels and brakes are critical components of an aircraft's landing gear system, ensuring safe landings and ground operations. This course provides participants with a foundational understanding of the principles and practices involved in maintaining aircraft wheels and brakes. Participants will learn about the components of wheel and brake systems, the procedures for inspecting and servicing these components, and the regulatory requirements for their maintenance. The course also covers common issues that can arise with wheels and brakes and how to troubleshoot and repair them effectively.

Course Objectives

To provide participants with the knowledge and skills necessary to maintain and service aircraft wheels and brake systems.

Course Outline

- Introduction to Aircraft Wheels and Brakes
- Components of Wheel and Brake Systems
- Inspection and Servicing Procedures
- Maintenance Best Practices
- Troubleshooting Common Issues
- Repair Techniques
- Regulatory Requirements
- Hands-On Practice
- Case Studies
